Panel Discussion

Wednesday, 4.6.2025, 14:00-16:00

Panelists:

Almut Kelber (HFSP Director of Research Grants)

Richard Sever (CSHL Press Assistant Director, co-funder of bioRxiv and medRxiv)

Giorgio Gilestro (Imperial College London, EDS Board Member)

Our goal is to foster a lively and candid conversation about evolving norms in publishing and funding. Each topic will be driven by 2–4 questions and short responses of the panelists, followed by more organic exchange with the audience.

Topic 1: Preprints, Peer Review, and the Publishing Ecosystem

- Do funders and hiring committees take preprints seriously?
- Is publishing in high-impact journals still essential for early-career success?
- Should peer review remain central, or is it time for new models?
- What is the future of journals?

Topic 2: The Funding Landscape for Young Investigators

- Do funders prioritize innovation or track record?
- Are small, early-career labs truly competitive in collaborative or interdisciplinary grants?
- Are funding agencies adapting to open science?
- Is there an implicit bias against *Drosophila* or model organisms?
